TELEPHONICS

COMMUNICATIONS & SURVEILLANCE SYSTEMS (CSS)

TECHNICAL PUBLICATIONS INDEX

Please be advised the Telephonics Communications and Surveillance Systems (CSS) Technical Publications Index has been revised to include new manuals and/or revisions which have been issued since the previous edition of the Publications Index. (See summary of changes on page 2)

Please replace any previous issues with this Index.

CMMs can be provided in electronic, PDF format where available. Please be aware that equipment Service Letters and Service Bulletins are also available.

If you have any questions or comments regarding any of our product publications, or if you require a PDF copy, please submit a request located on our internet website at:

INTRODUCTION

This Telephonics Publications Index lists all technical publications covering Telephonics Communications and Surveillance Systems (CSS) commercial aviation equipment currently in use. The 'CURRENT ACTIVE ISSUE' column lists the Revision(s) and Temporary Revision(s) that you need to make up a complete manual. If a dash (-) appears in this column, it means the manual is still in its' basic issue. If two revision numbers appear, it means the later revision is only a partial revision and not a complete replacement for the previous revision so both are needed to make up a complete manual. The Index is subdivided into ten tables as follows:

- Table 1 lists the publications covering the Passenger Entertainment and Service Multiplexing Equipment installed on the Boeing 747 aircraft.
- Table 2 lists the publications for the Cabin Interphone Equipment on the Boeing 747 aircraft. (Although Telephonics is now manufacturing and supporting this equipment, it was originally manufactured by Ford Industries of Portland, Oregon, therefore, some of the manuals in Table 2 carry the Ford Industries masthead.)
- Table 3 lists the publications covering the Lockheed L-1011 aircraft, Passenger Entertainment and Service Multiplexing Equipment.
- Table 4 lists the publications for the L-1011 aircraft, Cabin/Galley Interphone Equipment.
- Table 5 lists the remaining Telephonics equipment used on the L-1011 aircraft.
- Table 6 lists manuals for the buyer-furnished equipment; that is, for equipment (such as passenger control units and microphones) selected and purchased by the operator, rather than equipment furnished with the airplane by the airframe manufacturer.
- Table 7 lists ground support test equipment publications.
- Table 8 lists the publications covering the Boeing/Douglas DC-10 aircraft Passenger Entertainment and Service Multiplexing Equipment.
- Table 9 lists the publications covering Commuter Series Aircraft DADS and PACIS equipment.
- Table 10 lists the publications covering the Boeing/Douglas MD-80 Passenger Address Service Interphone Call System (PASICS), FINNAIR, FOKKER and ALITALIA equipment.
